

### **Call for Board Members**

The Hamburg Natural History Society was founded by concerned neighbors to preserve a unique local scientific and environmental resource and enhance science and outdoor education through the operation of Penn Dixie Fossil Park and Nature Reserve.

The organization is currently planning for a new Science and Outdoor Education Center and seeks skills and talent in planning and fundraising.

Openings currently exist on the Board and Capital Campaign Committee. Anyone passionate about the environment, outdoor activities, civic engagement, and/or science education is encouraged to get in touch with Executive Director Phil Stokes at [phil@penndixie.org](mailto:phil@penndixie.org).
